

COLEGIO RIVAS LUNA

Colegio Rivas Luna is located in L'Eliana, a location fully in contact with nature, 30 kms away from Valencia. Ours is a centre with a friendly atmosphere where a loving, caring attitude is used as the basis for the upbringing of the smallest children. Goals are worked through a "living" methodology, which seeks to arouse a desire to learn in the students.

Rivas Luna provides education at all levels: Pre-school (0-5 years old), Primary (6 -11 years old) Secondary (12-15 years old) and Upper Secondary (16-18 years old).

We live in a society which is increasingly pluralistic, which requires both teachers and schools to promote social cohesion whilst at the same time respecting all different education values. This is why our school is undertaking a plurilingual project where our students both in Primary and Secondary school learn different subjects not only in English but also in Valencian dialect. Also in this way, our team is highly eager to take active part in international projects where our students and staff can get in close contact with partners of different cultures, in order to increase their personal knowledge and develop further skills in foreign languages.
